IX

Vocabulary Review Sheet

Objective: The purpose of this lesson is to identify critical vocabulary used in this unit and to review the definitions of these words in preparation for the test.

Directions: Write the definition for each term listed below using complete sentences.

electricity

static electricity

electroscope

electric field

conductor

insulator

circuit

resistance

current

potential difference

series circuit

parallel circuit

magnetism

electromagnet

ammeter

voltmeter

electric motor

galvanometer

generator

transformer
